# 1. Introduction

SolPump is a decentralized betting platform built on the Solana blockchain that enables ultra-fast, frictionless gaming through its core offerings: Crash and Coinflip. Players connect their wallets directly, wager in SOL, and enjoy provably fair gameplay with cryptographic verification.

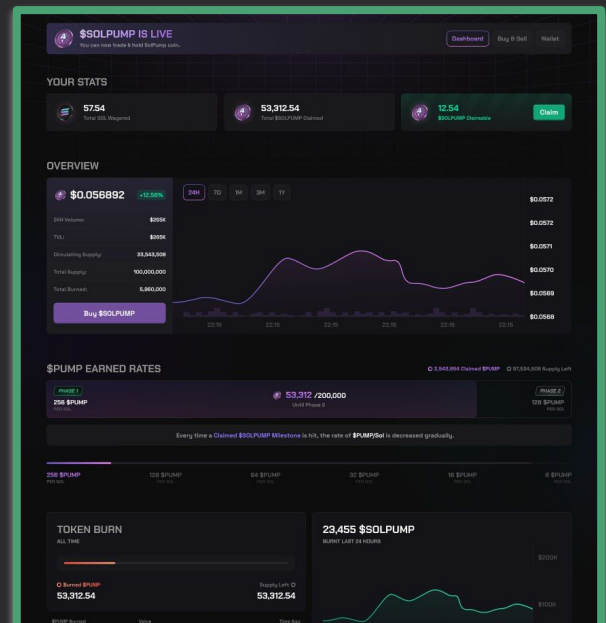

Active participation—through modest bets (as little as 0.001 SOL) and chat engagement—also earn hourly airdrop rewards. New users can unlock free SOL cases and win up to 10 SOL.

## 2. Mission & Vision

Our mission is to deliver a fast, transparent, and fully trustless on-chain betting experience on Solana—empowering users to play directly from their wallets, guaranteeing fairness through cryptographic provably fair systems. We seek to uphold user sovereignty and integrity in crypto gaming by eliminating intermediaries and unnecessary friction.

SolPump envisions becoming the leading decentralized gaming platform on Solana, where seamless and provably fair gaming is accessible to anyone. Fueling sustained engagement through community-driven mechanics like hourly airdrops and scalable promotions. It aims to harness Solana's speed and low fees to redefine trust and accessibility in Web3 gaming.
